

Best Gynecologists in Navi Mumbai | Dr. Pooja Vyas Bansal | Elawoman

Gynecologist: A health practitioner who specializes in treating illnesses of the lady reproductive organs and presenting nicely-woman health care that centers mostly on the reproductive organs.

[Gynecologists center](#) on women's sexual and reproductive health care. Physicians who specialize in women's sexual and reproductive health care — which includes the prognosis and treatment of issues of the male sex and reproductive organs — are referred to as urologists. You can visit a urologist if you're experiencing any issues along with your sexual or reproductive fitness.

An crucial way for women's to take care of themselves is to have a physical exam after they end up sexually energetic. During a male exam, a health care company will sense the testicles, scrotum, and penis to check for any parts.

Usually a health care issuer will carry out a rectal exam by using placing a lubricated finger into the anus to take a look at the prostate gland and take a look at for lumps or swelling in the rectum. The fitness care may additionally give an explanation for the way to reduce the chance of sexually transmitted infections and a man's function in birth control and pregnancy prevention.

While most gynecologists are also obstetricians, the sector of gynecology makes a specialty of all different components of a lady reproductive health from the onset of puberty through menopause and beyond.

Women see their gynecologist for their annual Pap take a look at and pelvic exam. Other

motives a lady could see her gynecologist are for infections or any pain or discomfort within the uterus, genitals or breasts. Gynecologists additionally help with infertility problems and contraception.

Gynecology diagnoses and treats diseases of the reproductive organs including cancer of the ovaries, uterus, cervix, vagina and fallopian tubes. A gynecologist also treats prolapse of the pelvic organs. This is a circumstance generally present in postmenopausal girls with weakened pelvic muscular tissues that can not support the uterus or bladder well.

Other illnesses treated are yeast and bacterial infections, irregular and painful menstruation, painful sex and different diseases related to menopause which might also require a surgical procedure.

Surgical approaches

Gynecology includes precise surgical approaches related to female reproductive organs. The most commonplace processes are

- 1. Tubal ligation – a permanent shape of beginning manage*
- 2. Hysterectomy- elimination of the uterus*
- 3. Oophorectomy – removal of the ovaries*
- 4. Salpingectomy – removal of the fallopian tubes*
- 5. Cone biopsy -get rid of precancerous cells inside the cervix recognized throughout a pap test*
