

Top Gynecologist | Dr. Sankar Das Mahapatra | Elawoman

A gynecologist doctor is a surgeon who specializes within the woman reproductive organs, which includes the cervix, fallopian tubes, ovaries, uterus, vagina, and vulva. Menstrual issues, birth control, sexuality, menopause, and infertility problems are recognized and treated by way of a gynecologist; most gynecologists additionally provide prenatal care and a few offer number one care.

Menstrual problems include amenorrhea (the absence of menstrual durations), dysmenorrhea (painful menstrual durations) and menorrhagia (heavy menstrual periods). Menorrhagia is a common indication for hysterectomy, that's the surgical elimination of the uterus. Ovarian cysts, endometriosis, and human virus are other situations that may be detected by a gynecologist, as are incontinence, prolapse of the pelvic organs and infections in any place of the female reproductive organs. A gynecologist can also locate fungal, bacterial, viral or protozoal infections.

Gynecologists most often perform an exam known as a pap smear, that is a test that uses an instrument called a speculum to detect abnormalities within the lady reproductive organs, along with cervical and ovarian cancers. Pap smears are conducted manually and regularly are followed by means of a rectovaginal examination, which permits for a complete exam of the pelvic area. An ultrasound can be used to verify any abnormalities detected with the aid of a Pap smear or rectovaginal exam.

*Most **gynecologist doctor** also is obstetricians. An obstetrician is an expert within the control of pregnancy, hard work, and the time right now following childbirth called puerperium. An obstetrician/gynecologist, also referred to as an OB/GYN, covers regions starting from preventive care to detection of sexually transmitted sicknesses to own family planning. They can also be involved in adolescent gynecology and endocrinology or deal with behavioral problems among younger ladies.*

The four subspecialties for an OB/GYN are gynecologic oncology, maternal/fetal treatment,

reproductive endocrinology and infertility, and urogynecology/reconstructive pelvic surgical procedure.
